

Chandigarh College of Architecture

M. ARCH

ADMISSIONS 2026

Masters in Architecture

The Postgraduate program at CCA i.e. M.Arch. deepens the professional understanding of students in various aspects of the built environment along with an aptitude for research and critical thinking. The main objective is to train the graduate students of Architecture to take informed decisions in designing buildings and infrastructure with a holistic approach engaged in establishing New Normals within shifting paradigms of Sustainability, Architecture and Urban Design as well as the challenges of environmental and living conditions. The Post graduate program at CCA combine theoretical rigour with studio based learning, i.e. students in life-like situations where the students are expected to propose solutions culled from an array of information and influencing parameters. This engages students to build a more pragmatic understanding towards the professional field and fine tune their collaborative skills enforced with technical and theoretical understanding. The course will encompass the experiences and analysis of Chandigarh, India's first planned modern city, its urban villages and infrastructure in the present day scenario. The programme offers choice-based-learning where students have the liberty to choose various electives subjects in every semester from a list of NPTEL/MOOCs courses etc besides the electives offered in the curriculum.

Eligibility:

Bachelors Degree in Architecture from a recognized University OR as equivalent, with minimum of 55% (for GEN/GEN-EWS) and 50% (for SC/ST), and valid CoA PGETA Score Card.
